

## PRESS RELEASE

**Biolab Farmacêutica and Mitelos agree to market OTIBLOCK® spray in Brazil. This represents a therapeutic alternative to treat impacted earwax.**

March 16, 2021.- **OTIBLOCK® spray** removes impacted earwax from the ear canal thanks to its formulation, which is oil-free and helps the ear to maintain its physiological pH. OTIBLOCK® which is due to go on sale by Biolab in the mentioned market has been developed by Mitelos.

By means of this agreement, Biolab will add yet another product to its ENT portfolio, a specialty in which it has significant commercial activity.

Caring for the ears is essential to prevent hearing problems and other symptoms. It is estimated that 1 in 20 adults at some point in their life will experience impacted ear wax. This figure rises to 1 in 3 people in the elderly population.

In addition to treat impacted earwax, OTIBLOCK® benefits patients prone to recurrences like those with narrow external ear canals, users of headphones and hearing aids, etc.

The product is already marketed in several countries worldwide with a very good acceptance by Doctors and patients.

OTIBLOCK® comes in a 45-mL dosage form, including an ergonomic, push-button otic spray, which enables the correct and convenient self-administration by the patient.

### **About Biolab**

*Biolab Pharma is a Brazilian company with an international presence and innovation imprinted in its DNA. Founded in 1997, it was born with a focus on the promotion of Health and Science. It is among the most prescribed laboratories and has one of the largest Sales Forces in the country. With a solid track record and more than 170 products in its portfolio, it is a leader in diversified markets, such as antihypertensive drugs in Cardiology, as well as scar treatment and hair health in Dermatology and antiemetics. It also stands out in Gynecology, Gastroenterology, Clinical Medicine, and Central Nervous System. The Generics division, founded in 2018, is one of the fastest growing companies in the segment. Biolab has three industrial units and a new complex under construction in Pouso Alegre (MG), as well as modern Research, Development, and Innovation Centers in Brazil and Canada, being responsible for the first national radical innovation and 400 patents filed.*
